

## Secretaría de Estado de Investigación, Desarrollo e Innovación

The State Innovation Strategy (E2I)(2013-2020) constitutes the framework of action for Government policy on innovation in order to contribute to changing the production model in Spain by promoting and creating structures that facilitate a better use of scientific knowledge and technological development.

It is based on diagnosing the current status of innovation in Spain. It determines and quantifies the medium and long-term goals that will improve the innovative capacity of our economy.

# E21

- Support and develop a knowledge based society
- Grants for formation (PhD) in enterprises and for scientists to work in industry
