

BMBF/PtJ funding priorities in marine research

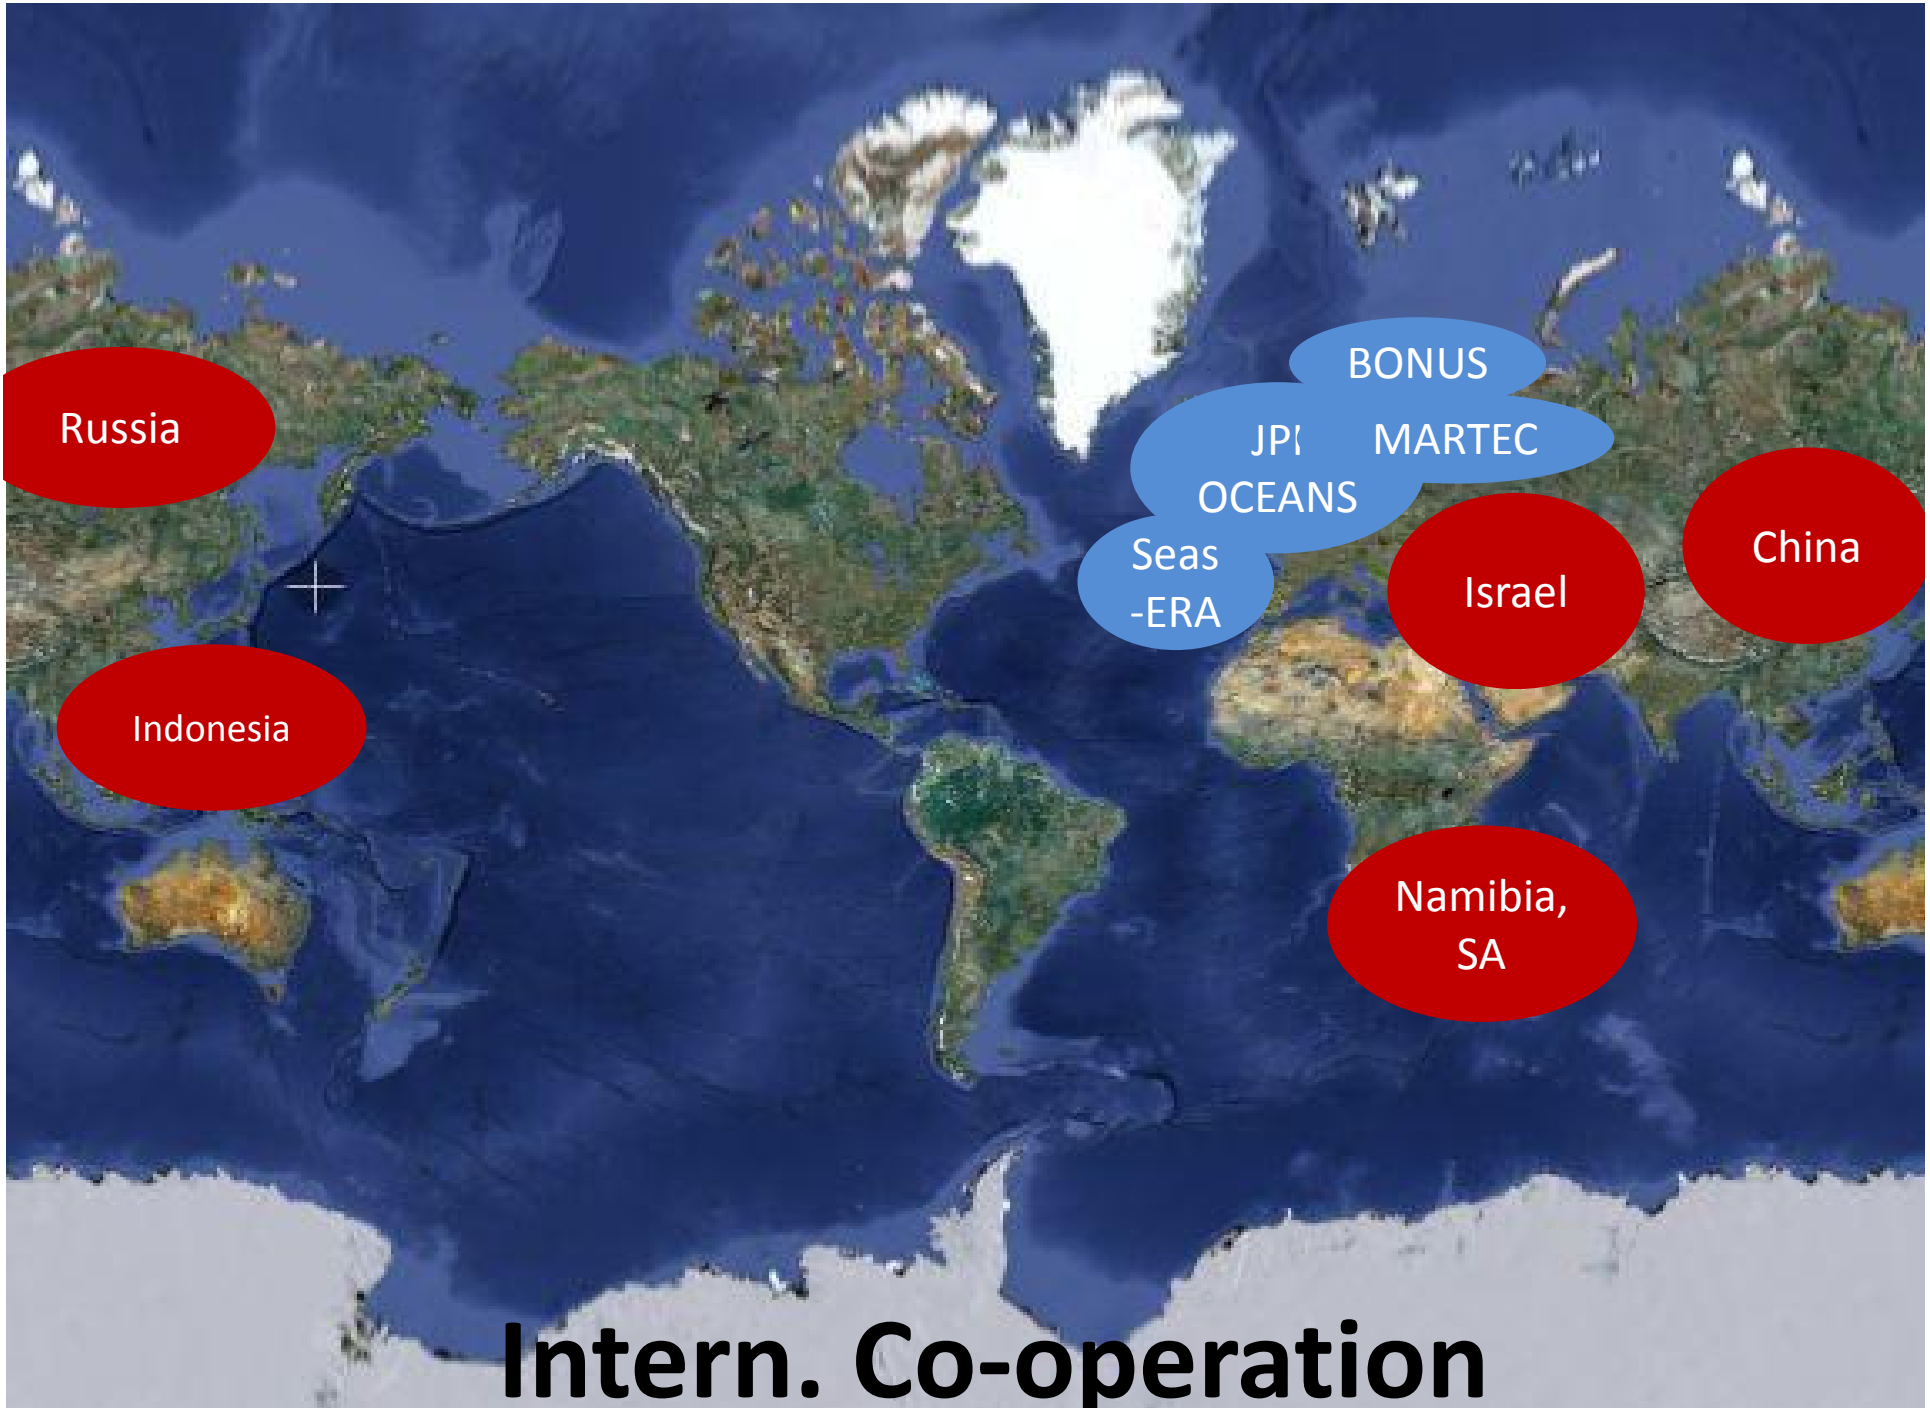

- **Relevanz of the oceans and seas for the global climate and its variability**
- **Impact of antropogenic activity on coastal seas and oceans (ressources, tourism, transport, pollution,...)**

R&D activities in the North- & Baltic Sea

Intern. Co-operation

Internal procedures at PtJ to follow up knowledge transfer:

- Focus on applied trans-disciplinary research by ensuring to involve all relevant stakeholders and possible end-users in the project team (only joint projects are funded)
- Visit all status seminars of funded projects
- Ensure results are published – last follow up 5 years after the project ended
